

ERRATUM

Fauvaud, S., and Fauvaud, M. (2013). "Photometry of minor planets. I. Rotation periods from lightcurve analysis for seven main-belt asteroids." *Minor Planet Bulletin* **40**, 224-229.

In the Data Reduction Section, a term has been forgotten during the writing process of the weighted differential magnitude (Δm) of the asteroid. The right Eq. (3) is the following one:

$$\Delta m = m_a - \sum_{i=1}^N \left[\left(\frac{m_{*i}}{\sigma_{*i}^2} \right) \right] / \left(\frac{1}{\sigma_{*i}^2} \right)$$
